

LIFE-THREATENING HEMORRHAGING

5,000,000

Approximately 5 million people die every year around the world from accidental & non-accidental trauma, making trauma the leading cause of death in people under the age of 45.

» www.cdc.gov

3 min

A victim who is bleeding from an artery can die in as little as 3 minutes.

» www.facs.org

30-40%

Hemorrhage is the 2nd leading cause of death for patients injured in the prehospital environment, accounting for 30-40% of all mortality.

» www.ncbi.nlm.nih.gov

28%

About 28% of patients with severe traumatic injury also have dysfunction in the process of coagulation (coagulopathy) when they arrive at the emergency department.

» www.ncbi.nlm.nih.gov

16%

A Canadian study of deaths due to trauma at a Level 1 trauma center found that up to 16% of deaths would have been preventable with earlier recognition of bleeding & more rapid and effective hemorrhage control.
