

L.A. Rescue Gear Bags

When you're looking for an equipment bag, you need one that can withstand the brutal world you work in. When you purchase an L.A. Rescue bag, you're purchasing insurance and assurance that your necessities will make it to the scene and back.

"I've had many of your products since the late 80's and they keep on doing their jobs. The quality has made them stand up to the rigors of the Fire Service and now 10 years of retirement."

- Jay Dudley

Lifetime Warranty

L.A. Rescue's gear bags are constructed of only the highest quality materials to ensure complete customer satisfaction. They guarantee their products to be free from defects in material and workmanship when used as intended under normal conditions. Damage caused by abuse, normal wear and tear, and improper care is not covered under this warranty.

What Makes L.A. Rescue Gear Bags Last a Lifetime?

L.A. Rescue understands the brutal world of EMS, and uses only the highest quality materials to construct their gear bags.

Extra-Large Storage Compartments

Main storage compartments feature extra large entry/access for ease in packing and unpacking.

Interior Liners

All lined compartments feature smooth-surfaced 420 denier nylon pack-cloth as protection for clothing or other items which might be damaged by the rugged surface of Cordura.

Interior Padding

All padding is closed cell "X-Link", waterproof, high-density foam.

Reflective Materials

Glow-Flex visibility material is used for a new dimension in safety. Glow-flex is both reflective and phosphorescent. This allows Your L.A. Rescue® products to be highly visible in darkness with or without light. Scotchlite super reflective silver trim is also used on some products.

Handles and Straps

One, two, and three inch heavy-duty black nylon webbing straps are used. All are triple stitched and reinforced for added strength and stability. Most webbing carry handles feature soft, high quality leather comfort wraps with Velcro closures. Comfort Grip elastomeric carry handle are also used, featuring made in U.S.A. heavy tubular nylon webbing. Adjustable padded ergonomic designed shoulder straps are used on most packs and bags, with a comfortable non-slip Cool-Guard coated mesh that covers the body contact areas.

Card Holder

Most L.A. Rescue® products include a Tanera leather card holder with a clear, scratch resistant, pliable plastic window.

Exterior Coverings

Except as otherwise noted, all L.A. Rescue® products are made from DuPont 1000 denier, super-K-coated Cordura nylon, DuPont 1050 denier Ballistic "Bomb Cloth", or 1080 denier Ballistic nylon. All water resistant, washable and virtually tear-proof. We use the toughest, most durable and practical heavy-duty exterior materials available.

Threads

Industrial-bonded nylon threads are utilized throughout. Most seams are double-stitched. High-stress areas are triple-stitched for maximum durability.

Zippers

All zippers are self-repairing, genuine heavy-duty YKK brand, industrial grade, sizes #8 and #10. Double sliding zippers, capable of accepting padlocks or tie raps, are utilized for all major cargo-pouch access closures. High-use storage compartments have nylon zip tabs to facilitate smooth zipper function.

Seams

All seams are sewn over with a 525 lb test nylon binding tape. This extra step assures the interior seams will not become "frayed" in the years ahead.

Strap-to-Bag Attachments

Shoulder strap, pack and other straps feature heavy-duty, welded steel "D" rings with matching steel-composite "Sure-Link" attachment hooks. All side-release buckles and tension locks are made of super tough Acetal, or Nylon.

Swivel Key Clips

All of the key clips are heavy-duty stainless steel.
